

Environmental Policy

The Board of Directors of Philip Grahame International Ltd is fully committed to achieving environmental best practice throughout its business activities, wherever this is practicable.

We recognize that the pursuit of economic growth and a healthy environment must be closely linked. In accordance with this we will employ an environmental management system for the products we provide to our clients.

Through this, we will identify our significant impacts and set clear objectives, against which we will monitor and manage our environmental performance and legislative compliance.

We will communicate with interested parties on aspects of our environmental performance, and will engage any concerns or interests they express in our environmental improvement programme.

The company actively supports the principles of pollution prevention in order to reduce the adverse environmental impacts of our operations, within reasonably practicable levels.

We comply with all statutory, regulatory and other requirements and are committed to continually improve our environmental performance by investing in design, innovation and best practices throughout our activities.

Life cycle assessments are important procedures that can help us reduce our product's impact on the environment. We not only assess the sustainability of the materials used in the production of our product we also acknowledge our responsibility from production to recycling at the end of the product's life.

By working closely with our suppliers and customers we aim to ensure a mutual understanding in our environmental improvement activities. This policy is communicated to all persons working for or on behalf of the organization.

We operate under a quality and environmental management system in compliance with BS EN ISO 9001:2015 and BS EN ISO 14001:2015 and maintain it through registration and annual review.

Mr. P. Nash

Technical Director
